

## Commercial Aircraft Market Higher Mortality Rates by 2022

### Description

The commercial aircraft market is driven by a number of factors such as skyrocketing passenger traffic, aviation network infrastructural improvements, development of quieter and fuel-efficient aircraft, and government initiatives taken by several national governments encouraging the domestic commercial aircraft market. Some of these include liberalized taxation regions, R&D investments, and measures that aid the indigenous manufacturing of commercial aircraft. The commercial aircraft market is projected to witness a modest CAGR of 4.1% for the period from 2017 to 2022.
