

Corporate Sustainability | Flowserve

Description

Flowserve is committed to our purpose of making the world better, together. We will continue to adapt, innovate and deliver for current and future generations by addressing environmental, social and governance (ESG) areas through our sustainability program. Our sustainability program has three key objectives – valuing our people, protecting the planet and promoting operational excellence. These

three objectives serve as our guide as we reduce our environmental footprint and advance technologies that support energy transition, build a safe and inclusive culture for our associates, contribute to our communities, and maintain strong governance practices and drive efficient business processes.
