

Halloween waste reduction, recycling and reusing

## Description

The seeds and pulp of carving pumpkins can be eaten, but more than half of the UK (59%) don't realise this, resulting in more than 12 million carving pumpkins being wasted every year. Before home composting or throwing away any leftover pumpkin we have recipe ideas for how to cook and enjoy this seasonal squash. And don't forget that once you've eaten all you can, your home compost bin will

love the rest of your pumpkin. Find out here more about the best mix for composting at home
