

Lebanon: EU helps implementing circular economy in wineries

Description

In late November 2018, together with its local partners in Lebanon, SCP/RAC, The Regional Activity Centre for Sustainable Consumption and Production, has participated to The final capitalisation Seminar of the Pilot Project entitled “Wine Innovation for Sustainable Economies” in order to discuss its outcomes. The seminar has been preceded by a visit to the beneficiary of the project in the Beqaa

valley namely Château Kefraya, to have more insights about the in situ composting process piloted on its premises. The seminar has witnessed the participation of many actors and has been an excellent opportunity to exchange ideas on the circular economy in Lebanon, beyond the winery sector.
