

NGC becomes first company in T&T to join GRI community

Description

The National Gas Company (NGC) has become the first organisation in Trinidad and Tobago to be registered as a member of the Global Reporting Initiative (GRI) community. Joining the GRI network represents the latest of 'first milestones' in NGC's strategy to build sustainability. The company is the first and remains the only state-owned enterprise to produce an annual sustainability report. From its first report, the NGC adopted GRI standards indicating its willingness to measure itself and perform against international standards. The GRI network comprises over 500 large, small, private and public organisations from more than 70 countries. They work to jointly advance sustainability reporting across all regions of the world. The GRI community provides members with access to learning and knowledge-sharing opportunities that help improve the quality of sustainability reporting with the GRI Standards.
