

Skol to a Sustainable Beer|InTheGroove

## Description

*default watermark*

When you're enjoying a glass of beer, do you ever consider how the beverage is made and whether the process is environmentally friendly? For Kim Dalum, brewing is a passion, and his startup company focuses on reducing the carbon emissions in craft breweries. Trelleborg Sealing Solutions contributed to make his dream of sustainable craft brewing a reality. Trelleborg Sealing Solutions collaborated with Dalum Beverage Equipment in the development of a CO2 compressor. The compressor is one part of a CO2 recovery plant, enabling craft breweries to recycle CO2 emitted during fermentation. Turcon® MF6 is the optimum material in the compressor's challenging operating environment.
