

Veolia Water Technologies Launches New Disruptive Technology for Desalination and Water Reuse in Asia Pacific | ASIA TODAY News & Events

Description

Veolia Water Technologies, a subsidiary of the Veolia group and leading specialist in water treatment, announces the Asia Pacific launch of the Barrel™, an integrated plug-and-play reverse osmosis (RO) technology. The Barrel will be showcased at the upcoming CleanEnviro Summit Singapore (18-21

April) and OzWater 2022 trade exhibition in Brisbane, Australia (10-12 May). With increasing demand for fresh water and rising concerns over scarcity in the region, the Barrel meets the challenges and expectations of the desalination market while producing fresh water complying with all water quality standards. It is also suitable for wastewater reuse and low pressure RO applications. The Barrel will empower users with an economically viable and sustainable source of fresh water.
